++++

19. (original) The computer program embodied on a computer readable medium of claim 18 wherein the plurality of methods for communication includes at least two selected from group consisting essentially of:

email, electronic chat, live streaming audio, voice over the network, telephone, still picture, streaming live video and a collaborative interactive page.

20. (original) The computer program embodied on a computer readable medium of claim 18 wherein said user interface further including:

code segment for providing at least one interactive window for displaying a financial model generated by the financial modeling system.

21. (original) The computer program embodied on a computer readable medium of claim 20 wherein said user interface further including:

code segment for providing a plurality of function icons for performing various operations on said generated financial model.

22. (original) The computer program embodied on a computer readable medium of claim 21 wherein said function icons include at least one of:

transact, monitor, model, explore, track.

23. (original) The computer program embodied on a computer readable medium of claim 20 wherein said user interface further including:

code segment for providing at least one dynamic window for displaying characteristics related to said generated financial model.

24. (original) The computer program embodied on a computer readable medium of claim 18 wherein said user interface further including:

code segment for providing at least one interactive window for displaying help messages related to using the financial modeling system.

25. (original) The computer program embodied on a computer readable medium of claim 18 wherein said user interface further including:

code segment for providing at least one profile icon for performing various operations on a user profile based on user information.
